

SHUT DOWN DEVICES - PROFLO® Jr.

PRODUCT DESCRIPTION

The Proflo® Jr. monitoring device provides shut-down protection for your compressor based on the operation of the cycle times of the divider block system. If the pump deteriorates or if the lubricant flow slows down, the cycle time of the lube system will fall below the specified alarm time. This will prompt the Proflo® Jr. to change to alarm state and shutdown the compressor, preventing damage to the compressor cylinders, pistons, rods and packing.

FEATURES

- 3.3 volt hermetically sealed high temperature battery
- AC or DC operation, switch rated for 300 VDC and 120 VAC @.5 amps
- Patented sealed magnet assembly, No lost magnets, springs or spacers EVER
- Heavy duty magnet housing eliminated possibility of failure caused by bending
- Proximity switch output is standard with every unit
- Hall effect activated
- Field replaceable battery
- For CPI HP/XD/DropsA/Trabon/SB/Lincoln divider block/valve applications
- Blinking LED cycle indication
- Monitors movement of divider block piston for “timed” shutdown protection
- Closed loop or open loop operation
- Requires no external power
- Up to 10 year battery life, 5 year battery warranty
